About the Program

- Students studying this major learn how to program machines and operate equipment to create metal parts, either in large quantities, or one at the time. Parts may range from simple bolts to complex bone screws for orthopedic implants.
- Created with employer input, Tri-County's CNC program produces graduates in high demand for great paying jobs in companies that are using the latest technologies for competing in the global marketplace.
- Students build a competitive and marketable resume for a variety of employment opportunities, primarily in advanced manufacturing, including aerospace, automotive, medical, and plastics..

About the Pathway

- CNC Programming and Operations is a Technical Career Pathway in which courses and textbooks are at no cost to students planning to enter the career field after high school.
- High school students take dual enrollment classes at the TCTC Industrial Technology Center in Sandy Springs, Monday through Thursday, in the afternoon.
- After high school, students seamlessly transition into the Associate in Applied Science degree CNC program at the TCTC Industrial Technology Center.
